

NOOR MOHAMMAD

Java Backend Developer

+91-7052806684 | noorsonu11@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience building and deploying production-style REST APIs using Spring Boot, Spring Security (JWT), and MySQL. Designed and shipped 2 full-stack backend projects covering authentication, layered architecture, and API documentation. Strong foundation in writing clean, maintainable Java code.

TECHNICAL SKILLS

- **Languages & Core:** Java
- **Core Java:** OOP, Collections, Data Structures & Algorithms, Exception Handling
- **Backend:** Spring Boot, Spring Security (JWT Authentication), REST API Development, JPA/Hibernate, Bean Validation, Global Exception Handling
- **API & Documentation:** Swagger, Postman
- **Database:** MySQL, PostgreSQL
- **Tools & Platforms:** Git, GitHub, Maven, IntelliJ IDEA, VS Code, Render (Cloud Deployment)
- **Frontend (Basic):** HTML, CSS, JavaScript, React.js

PROJECTS

SecureCart – E-Commerce REST API | Java, Spring Boot, Spring Security, JWT, MySQL, MapStruct, Swagger

- Architected a layered (Controller–Service–Repository) REST API with 4 core modules — User, Product, Cart, and Order — supporting full CRUD, pagination, and sorting.
- Implemented JWT-based authentication and role-based authorization using Spring Security, securing all API endpoints against unauthorized access.
- Enforced clean API contracts with MapStruct DTO mapping, Bean Validation, and centralized global exception handling to eliminate raw stack-trace leaks.
- Code: github.com/noorsonu/SecureCart

Student Management System | Java, Spring Boot, MySQL, JPA/Hibernate, Postman

- Built REST APIs in Java and Spring Boot to manage student records, supporting complete CRUD operations (add, update, delete, view).
- Integrated MySQL via JPA/Hibernate for persistent data storage, applying the DTO pattern to decouple request and response models.
- Validated all endpoints in Postman and implemented structured exception handling for predictable, standards-compliant HTTP responses.

ACHIEVEMENTS

- Solved 200+ Data Structures & Algorithms problems on CodeChef, demonstrating strong problem-solving fundamentals for technical interviews.
- Independently designed, built, and deployed 2 backend projects end-to-end — from schema design to live cloud deployment.
- Self-directed learning of production-grade practices: JWT authentication, DTO/MapStruct patterns, and API documentation via Swagger.

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology

Technocrats Institute of Technology | 2025 | CGPA: 7.66

Senior Secondary (Class XII)

R.B.T. Vidyalaya, Deoria | 2021 | 61.3%
